Victor Lam

Acting Chief Information Officer, City of Lakewood, Washington
mingmanhk@gmail.com · linkedin.com/in/mingmanhk · github.com/mingmanhk · mingmanhk.github.io/React-Portfolio

Public-sector CIO and enterprise IT leader with 18+ years modernizing infrastructure, security, and service operations. Currently Acting CIO for the City of Lakewood, Washington, leading citywide strategy, Zero Trust identity, and resilient hybrid infrastructure. Known for turning operating data into defensible investment decisions: 99% SLA compliance, 70% fewer help desk tickets, and hardware and software spend cut in half.

Experience

City of Lakewood, Washington · Acting Chief Information Officer / IT Manager — Mar 2026 to Present

Lead citywide IT strategy, infrastructure modernization, and cybersecurity across City Hall, Police, Parks, and public-facing services.

Strategy and governance

- Drive strategic planning, unified technology standards, and project delivery that align every investment to cost efficiency, operational fit, and regulatory compliance.
- Implement data-driven governance for assets, service desk operations, and licensing to support transparent, defensible budget decisions.

Security and identity

- Oversee the City's cybersecurity and compliance program, including access management, monitoring, and data protection.
- Lead the City's identity and access modernization, guided by Zero Trust principles.

Infrastructure and resilience

- Manage on-premises and cloud infrastructure for high performance, reliability, and secure connectivity across all departments.
- Reduce virtualization and licensing costs through platform consolidation while improving disaster-recovery resilience for critical systems.

FRS Clipper · IT Consultant — Nov 2025 to Feb 2026

Strategic IT consulting for a Seattle-based passenger ferry and travel operator, advising leadership on operations, infrastructure, and security.

- Led the integration of U.S. operations with the parent company in Flensburg, Germany, ensuring seamless connectivity and alignment with global standards.
- Collaborated with international IT teams and a German developer to keep cross-border projects on schedule and meeting quality expectations.
- Evaluated software, vendor services, and support workflows, and developed ITIL-based migration plans with prioritized recommendations for reliability, security, and efficiency.
- Provided hands-on support and training to Seattle IT staff, improving local capabilities and day-to-day service stability.

PinkkaMii LLC · Founder and IT Consultant — May 2025 to Present

Independent practice delivering IT consulting and software products.

- Built and launched W1IT.com, an IT consulting and managed services brand for network architecture, design, and security assessments.
- Launched Taskin.app and shipped native Apple apps in Swift and SwiftUI, including Pixel Color Pick (Mac App Store) and DeepTicker (iOS).
- Advise small businesses on cloud infrastructure, security, and IT operations.

Alibaba Group (U.S.) Inc. · IT Manager — May 2018 to Apr 2025

Led Americas IT service operations for 1,000+ users across Windows, macOS, virtual desktops, and mobile.

Service delivery

- Reached 99% SLA compliance by rebuilding global ticketing on ITIL and refining SLA and KPI frameworks.
- Cut help desk volume 70% with global SOPs, a self-service knowledge library, and automation and AI chatbot tools.

Financial and asset governance

- Halved hardware and software spend through predictive procurement built with Finance, at 95% forecast accuracy.
- Reduced operating costs 30% through vendor performance management, SLA enforcement, and negotiation.
- Ran global asset lifecycle programs with 100% audit accuracy and zero asset loss; RFID and BLE tracking cut reconciliation time 95%.

Leadership

- Built executive KPI and total-cost-of-ownership dashboards in SQL, Python, Tableau, and Power BI, and mentored Tier 1–3 teams across regions.

Beyondsoft Consulting Inc. · Senior IT Manager — Jun 2016 to May 2018

Built IT from the ground up as the company grew from 30 to 500+ users across multiple states.

- Led IT due diligence and onboarding for 5+ mergers and acquisitions with full asset continuity.
- Drove a cloud-first strategy on VMware, Azure, and AWS to improve scalability and reduce infrastructure overhead.
- Established ISO, SOX, SOC, and HIPAA compliance controls and disaster recovery frameworks.

HTC America Inc. · IT Manager, promoted from Software Developer — Apr 2007 to Jun 2016

Led North American service desk, network, and systems administration teams.

- Built and migrated a U.S. colocation data center with 100% uptime and no business disruption.
- Moved on-premises systems to VMware and Azure, and wrote disaster recovery and continuity plans that supported ISO certification.
- Developed APIs and tuned SQL for cross-platform data integration with global SAP teams.

Directron.com · Full-Stack Developer — Mar 2005 to Apr 2007

Built internal web applications, PHP services, and MySQL databases for warehouse, order, and inventory systems.
