Victor Lam

Acting Chief Information Officer, City of Lakewood, Washington
mingmanhk@gmail.com · linkedin.com/in/mingmanhk · github.com/mingmanhk · mingmanhk.github.io/React-Portfolio

Public-sector CIO and enterprise IT leader with 18+ years modernizing infrastructure, security, and service operations. Currently Acting CIO for the City of Lakewood, Washington, leading citywide strategy, Zero Trust identity, and resilient hybrid infrastructure. Known for turning operating data into defensible investment decisions: 99% SLA compliance, 70% fewer help desk tickets, and hardware and software spend cut in half.

Experience

City of Lakewood, Washington · Acting Chief Information Officer / IT Manager

Mar 2026 to Present

Lead citywide IT strategy, infrastructure modernization, and cybersecurity across City Hall, Police, Parks, and public-facing services.

Strategy and governance

- Drive strategic planning, unified technology standards, and project delivery that align every investment to cost efficiency, operational fit, and regulatory compliance.
- Implement data-driven governance for assets, service desk operations, and licensing to support transparent, defensible budget decisions.

Security and identity

- Oversee the City's cybersecurity and compliance program, including access management, monitoring, and data protection.
- Lead the City's identity and access modernization, guided by Zero Trust principles.

Infrastructure and resilience

- Manage on-premises and cloud infrastructure for high performance, reliability, and secure connectivity across all departments.
- Reduce virtualization and licensing costs through platform consolidation while improving disaster-recovery resilience for critical systems.

FRS Clipper · IT Consultant

Nov 2025 to Feb 2026

Delivered strategic IT consulting for a Seattle-based passenger ferry and travel operator, advising leadership on operations, infrastructure modernization, and security.

Strategic advisory and cross-border integration

- Led the integration of U.S. operations with the parent company in Flensburg, Germany, ensuring seamless connectivity and alignment with global standards.
- Collaborated with international IT teams and a German developer to keep cross-border projects on schedule and meeting quality expectations.
- Evaluated software, vendor services, and support workflows, developing ITIL-based migration plans with prioritized recommendations for reliability, security, and efficiency.

Infrastructure modernization

- Rebuilt core infrastructure: Active Directory and domain structure, VMware hosts, file and print services with redesigned shared storage and permissions, and the network (VLANs, routing, firewall policies, segmentation).
- Strengthened identity, access, and security controls aligned with Zero Trust principles.

Operational stability and team enablement

- Provided hands-on technical support and training to Seattle IT staff, improving local capabilities and day-to-day service stability.
- Streamlined support workflows and processes to reduce friction and increase reliability across U.S. operations.

PinkkaMii LLC · Founder and IT Consultant

May 2025 to Present

Independent practice building AI-driven security tools and software products, and advising small businesses on IT.

AI and security engineering

- Built an LLM-based threat-prediction model for a NOC dashboard that correlates Checkmk monitoring and SIEM events to surface emerging threats in real time.
- Applied AI and machine learning to scale security monitoring and to measure security posture and risk with repeatable, automated assessments.

Products

- Launched Taskin.app and shipped native macOS apps in Swift and SwiftUI, including ScreenGrabber, Contact SyncMate, and Pixel Color Pick (Mac App Store), plus DeepTicker for iOS.

Consulting

- Built and launched W1IT.com, an IT consulting and managed services brand for network architecture, design, and security assessments.
- Advise small businesses on cloud infrastructure, security, and IT operations.

Alibaba Group (U.S.) Inc. · IT Manager

May 2018 to Apr 2025

Led Americas IT service operations for 1,000+ users and global asset, procurement, and ITSM programs.

Service delivery

- Achieved 99.9%+ user satisfaction and 99% SLA compliance across Windows, macOS, VDI, and mobile through structured escalation and proactive support.
- Rebuilt global ticketing on ITIL and standardized ITSM platforms (ServiceNow, Jira, Freshworks, HP Service Manager, SCSM), refining SLA and KPI frameworks to reduce incident recurrence.
- Cut help desk volume 70% with SOPs, governance libraries, and self-service portals, plus automation and AI chatbots for self-healing workflows.

Financial and asset governance

- Halved procurement spend through predictive modeling built with Finance, reaching 95% forecast accuracy and shrinking the inventory footprint.
- Reduced vendor costs 30% through contract management, SLA enforcement, performance monitoring, and negotiation.
- Directed global asset lifecycle programs with 100% audit accuracy and zero loss; RFID and BLE automation cut reconciliation time 95% and kept the CMDB accurate in real time.

Executive support and leadership

- Built predictive executive dashboards in SQL, Python, Tableau, and Power BI for KPIs, SLA adherence, and total cost of ownership.
- Ran infrastructure refresh cycles for AV, executive meeting rooms, and collaboration tools, and managed executive incident response and root-cause analysis.
- Mentored Tier 1–3 global teams in escalation discipline and technical excellence.

Beyondsoft Consulting Inc. · Senior IT Manager

Jun 2016 to May 2018

Built IT from the ground up as the company grew from 30 to 500+ users across multi-state offices.

Strategy and architecture

- Designed foundational IT standards, policies, support procedures, and enterprise architecture, taking each from first draft to company-wide adoption.
- Developed infrastructure roadmaps aligned with business goals, improving performance and disaster resilience across data center and remote offices.
- Championed a cloud-first strategy on VMware, Azure, and AWS, increasing scalability and reducing infrastructure overhead across hybrid environments.

Mergers and governance

- Led IT due diligence and service readiness for 5+ M&A integrations, with compliant onboarding, asset continuity, and alignment to parent-company standards.
- Implemented ISO, SOX, SOC, and HIPAA controls and disaster recovery and continuity frameworks, keeping the company audit-ready.

Operations

- Reengineered IT and asset workflows and established monitoring and performance metrics, improving transparency, budget control, and asset visibility.
- Directed cross-functional teams delivering infrastructure upgrades, asset lifecycle programs, and continuity projects on time and in scope.

HTC America Inc. · Senior IT Manager — Apr 2007 to Jun 2016

Directed North American IT operations (service desk, network, systems administration) and regional IT strategy, after rising from engineer to senior manager.

Infrastructure and resilience

- Established and ran a U.S. colocation data center, delivering upgrade and migration projects with 100% uptime and zero business disruption.
- Led hybrid modernization from on-premises to VMware and Azure, improving scalability, performance, and resilience.
- Wrote enterprise IT policies and disaster recovery and continuity plans that supported ISO certification and audit readiness.

Enterprise systems and integration

- Aligned regional infrastructure with global SAP deployments and managed CRM integration with external business partners.
- Designed APIs and tuned SQL performance, reducing database latency and improving reporting accuracy.
- Delivered software and infrastructure projects on time and in scope, including a Cisco Call Manager 4.0 to 9.0 migration and Expressway videoconferencing.

Career progression, 2007–2012

- MIS Engineer, IT Engineer, Software Programmer Analyst, and IT Operations Lead before promotion to Senior IT Manager in 2013; built an enterprise SharePoint 2010 platform, EDI and encrypted data exchange (VB.NET, XML, SFTP, PGP), and SQL Server reporting automation.

Early career · AxionTech.com and Directron.com — 2006 to 2007

Software Developer at AxionTech.com (APIs, SQL optimization, software delivery) and technical support at Directron.com (systems consulting and network installation).

Capabilities

Leadership and strategy	IT strategy and roadmaps · Budget, procurement, and vendors · Policy and governance · Distributed team leadership
Security and governance	Zero Trust identity and access · SIEM, monitoring, threat detection · ISO, SOX, SOC, HIPAA controls · Risk assessment and audit readiness
Infrastructure and cloud	Hybrid on-premises and cloud · Microsoft 365 and Entra ID · AWS, Azure, and VMware · Disaster recovery and continuity
Service delivery and operations	ITIL service design · ServiceNow, Jira, Freshworks · Asset lifecycle and CMDB · KPI and SLA dashboards
Engineering and development	AI, ML, and LLM integration · React and Node.js · Swift and SwiftUI · SQL and Python

Education

M.S., Computer Information Technology Systems — University of Houston, 2011–2013

B.S., Computer Science, minor in Management — Dallas Baptist University, 2002–2005

Full-Stack Coding Boot Camp — University of Washington, 2023
