Victor Lam

Acting Chief Information Officer, City of Lakewood, Washington

mingmanhk@gmail.com · linkedin.com/in/mingmanhk · github.com/mingmanhk · mingmanhk.github.io/React-Portfolio

I lead technology for a city government: the networks, identity, and service desk that police, parks, and City Hall depend on every day. Before Lakewood, I spent 18 years running IT for global companies in the Seattle area.

Experience

City of Lakewood, Washington · Acting Chief Information Officer / IT Manager — Mar 2026 to Present

- Lead citywide IT strategy, infrastructure modernization, and cybersecurity across City Hall, Police, Parks, and public-facing services.
- Manage on-premises and cloud infrastructure for high performance, reliability, and secure connectivity across all departments.
- Drive strategic planning, unified technology standards, and project delivery that align every investment to cost efficiency, operational fit, and regulatory compliance.
- Oversee the City's cybersecurity and compliance program, including access management, monitoring, and data protection.
- Lead the City's identity and access modernization, guided by Zero Trust principles.
- Reduce virtualization and licensing costs through platform consolidation while improving disaster-recovery resilience for critical systems.
- Implement data-driven governance for assets, service desk operations, and licensing to support transparent, defensible budget decisions.

FRS Clipper · IT Consultant — Nov 2025 to Feb 2026

- Provided strategic IT consulting for a Seattle-based passenger ferry and travel operator, advising leadership on operations, infrastructure, and security.
- Led the integration of U.S. operations with the parent company in Flensburg, Germany, ensuring seamless connectivity and alignment with global standards.
- Collaborated closely with international IT teams and a German developer to keep cross-border projects on schedule and meeting quality expectations.
- Evaluated existing software, vendor services, and support workflows, developing migration and systems-planning strategies grounded in ITIL principles.
- Delivered prioritized, actionable recommendations to strengthen reliability, security, and operational efficiency.
- Provided hands-on technical support and training to Seattle-based IT staff, improving local capabilities and day-to-day service stability.

PinkkaMii LLC · Founder and IT Consultant — May 2025 to Present

- Founded an independent practice delivering IT consulting and building software products.
- Built and launched W1IT.com, an IT consulting and managed services brand focused on network architecture, design, and security assessments.
- Launched Taskin.app, a free browser-based toolkit of everyday utilities, from QR codes and image tools to file conversion and AI-assisted stock analysis.
- Shipped native Apple apps in Swift and SwiftUI, including Pixel Color Pick on the Mac App Store and the DeepTicker AI portfolio tracker for iOS.
- Advise small businesses on cloud infrastructure, security, and IT operations.

Alibaba Group (U.S.) Inc. · IT Manager — May 2018 to Apr 2025

- Directed Americas service desk operations for 1,000+ users across Windows, macOS, virtual desktops, and mobile, reaching 99% SLA compliance.
- Revamped global ticketing in line with ITIL, refining SLA and KPI frameworks for better reporting and user experience.
- Built global SOPs and a knowledge library that cut help desk volume by 70%.
- Automated inventory tracking with RFID and BLE, reducing reconciliation time by 95% and improving CMDB accuracy.
- Partnered with Finance on predictive procurement models, reaching 95% forecast accuracy and halving hardware and software spend.
- Ran global asset lifecycle programs to cybersecurity and governance standards with 100% audit accuracy and zero asset loss.
- Built executive dashboards in SQL, Python, Tableau, and Power BI for KPIs, SLA adherence, and total cost of ownership.
- Reduced operating costs by 30% through vendor performance management, SLA enforcement, and negotiation.
- Introduced automation and AI chatbot tools for self-healing workflows and faster responses.
- Mentored Tier 1–3 service desk teams across regions.

Beyondsoft Consulting Inc. · Senior IT Manager — Jun 2016 to May 2018

- Built IT policy and support frameworks from scratch as the company grew from 30 to 500+ users across multiple states.
- Led IT due diligence and onboarding for 5+ mergers and acquisitions with full asset continuity.
- Drove a cloud-first strategy on VMware, Azure, and AWS to improve scalability and reduce infrastructure overhead.
- Established ISO, SOX, SOC, and HIPAA compliance controls and disaster recovery frameworks.

HTC America Inc. · IT Manager, promoted from Software Developer — Apr 2007 to Jun 2016

- Led North American service desk, network, and systems administration teams.
- Built and migrated a U.S. colocation data center with 100% uptime and no business disruption.
- Moved on-premises systems to virtualized VMware and Azure environments.
- Wrote disaster recovery and business continuity plans that supported ISO certification.
- Developed APIs and tuned SQL performance for cross-platform data integration, working with global SAP teams.

Directron.com · Full-Stack Developer — Mar 2005 to Apr 2007

- Built internal web applications that streamlined warehouse operations and e-commerce workflows.
- Engineered and maintained PHP back-end services and MySQL databases for order and inventory systems.
